5. Policy Information

Some plants have the potential to pose a risk to children’s health, either through consumption, or through skin or respiratory irritation. Other plants can pose a danger through the attraction of bees, wasps, or even through sharp plant matter. To prevent any danger to children attending The Hutchins School’s Children’s Services, the School will ensure that toxic and dangerous plants are not accessible from, nor planted in the licensed care area.

Risk Reduction Strategies

- The School will refer to the Children’s Hospital at Westmead’s list of plants and vegetation that can be harmful to children when considering new flora for the licensed Children’s Services areas;
- The maintenance staff will check the licensed area annually to ensure that there are no harmful plants in the gardens, according to the compliance item in the School’s Emergency & Risk Management System;
6. Supporting Procedures / Guidelines

As noted in policy text.

12. Further Action: Details

In order to ensure the health and safety of the children in care at The Hutchins School: Children’s Services, a compliance item has been created ensuring an annual review of the plants and vegetation in the gardens and surrounds of The Hutchins School. To complement this process, maintenance and ground staff will be provided with information and training to assist in identifying potentially hazardous plants.
